■ EDUCATION

Indiana University

Aug 2022 – Dec 2026

B.S. in Informatics — Minors in Human-Centered Computing & Web Design
Bloomington, Indiana

Coursework Human-Computer Interaction & Design · Methods for Human-Centered Computing · Design & Development of an Information System · Web Design · JavaScript · Intro to Cybersecurity · Computer & Information Ethics

- ♦ ITIT — senior capstone: an IoT asset-tracking system that syncs hardware trackers with a web app, on a nested Deployments → Locations → Trackers → Items model with CSV export.

Allegan County Area Technical & Education Center

Sep 2021 – May 2022

Computer Information Systems

Allegan, Michigan

- ♦ Installed, configured, and administered network infrastructure end-to-end, and built/modified computer hardware, software, and operating systems to spec.

■ EXPERIENCE

Tire Rack · South Bend, Indiana (hybrid)

Innovation & AI Intern

Jun 2026 – Aug 2026

- ♦ Designed and prototyped TRACTION, a sales-enablement rep console — an engine scores customers on LTV × churn × signal recency into a suppression-filtered, frequency-capped daily queue, pairing each lead with a why-now reason, cross-channel history, and an AI-matched cart.
- ♦ Built and shipped a production SMS gateway (Python / FastAPI on Cloud Run) that lets customers text Tire Rack's TRACI AI agent — webhook → async worker → agent → Twilio SMS, with Redis/SQS, STOP/HELP compliance, 90 tests, and keyless CI/CD; solved the web-only vehicle picker with a numbered YMMV drill-down that auto-supplies factory tire size.
- ♦ Built Karst, a Next.js + Firebase caving field guide (web + Android) with a privacy-first map — shipped fast with AI-assisted development.

University Information Technology Services · Indiana University

SCIPS Consultant Supervisor

Aug 2024 – Feb 2026

- ♦ Led the Tech Team and walk-in Support Center, coaching consultants through complex technical and customer issues.
- ♦ Drove campus-wide support for labs, printers, and classroom tech — from preemptive checks to urgent in-person requests.

TCC Tech Team

Nov 2023 – May 2024

- ♦ Resolved client tickets across virtual, in-office, and in-room appointments, and set up wired/wireless connectivity for campus residents.

Technology Center Consultant

Sep 2023 – Nov 2023

- ♦ Troubleshoot software and printer issues for walk-in clients and kept lab equipment stocked and organized.
- ♦ Logged and tracked issues in ticketing systems, producing customer and lab reports.

■ SKILLS

Languages

JavaScript, Python, PHP, MySQL

Web & Frameworks

React / Next.js, HTML, CSS, Firebase, Git

Design

Figma, UX & HCI Design, Web Design, Tableau

Operating Systems

Linux, macOS, Windows 10/11, Windows Server

Tools

Active Directory, Claude Code, Office365, VirtualBox, VMware, VS Code, WSL

■ CERTIFICATIONS

- ♦ Certiport ITS — Computational Thinking, Cybersecurity, Device Configuration & Management, Network Security & Networking
- ♦ Cisco Certified Support Technician — Cybersecurity
- ♦ Cisco IT Essentials
- ♦ TestOut PC Pro

■ PROJECTS

- ♦ **TRACTION Rep Console** — AI-scored retention queue for Tire Rack reps — UX · Prototype · CRM
- ♦ **TRACI SMS Gateway** — text Tire Rack's AI agent — FastAPI · Cloud Run · Twilio
- ♦ **Karst** — Next.js + Firebase caving field guide (web + Android)
- ♦ **ITIT** — IoT inventory tracker · senior capstone
- ♦ **Corne 42** — hand-built split wireless keyboard with rotary encoders (ZMK)

■ OFF THE CLOCK

Caving · Coffee · Gym · Hiking · PC building · Custom keyboards · Plants · Reading · Swimming
