EDUCATION

Indiana University
Aug 2022 – Dec 2026

B.S. in Informatics — Minors in Human-Centered Computing & Web Design

Bloomington, Indiana

Coursework Human-Computer Interaction & Design · Methods for Human-Centered Computing · Design & Development of an Information System · Web Design · JavaScript · Intro to Cybersecurity · Computer & Information Ethics

- ITIT — senior capstone: an IoT asset-tracking system that syncs hardware trackers with a web app, on a nested Deployments → Locations → Trackers → Items model with CSV export.

Allegan County Area Technical & Education Center
Sep 2021 – May 2022

Computer Information Systems

Allegan, Michigan

- Installed, configured, and administered network infrastructure end-to-end, and built/modified computer hardware, software, and operating systems to spec.

EXPERIENCE

Tire Rack · South Bend, Indiana (hybrid)

Innovation & AI Intern
Jun 2026 – Aug 2026

- Designed and prototyped TRACTION, an AI-assisted sales console for retention reps — a ranked daily call queue that pairs each lead with a why-now reason, cross-channel history, and an AI-matched cart; turned another team's loose ideas into a mockup presented to senior leadership.
- Designed, built, and shipped solo a production SMS gateway (Python / FastAPI on Cloud Run + Twilio) that lets customers text Tire Rack's TRACI AI agent — async workers, Redis sessions, STOP/HELP compliance, 90 tests, and keyless CI/CD; replaced the web-only vehicle picker with a numbered text drill-down that auto-fills factory tire size.
- Worked AI-first with Claude Code as a pair programmer, shipping a production service and a leadership-ready prototype in ten weeks.

University Information Technology Services · Indiana University

SCIPS Consultant Supervisor
Aug 2024 – Feb 2026

- Led the Tech Team and walk-in Support Center, coaching consultants through complex technical and customer issues.
- Drove campus-wide support for labs, printers, and classroom tech — from preemptive checks to urgent in-person requests.

TCC Tech Team
Nov 2023 – May 2024

- Resolved client tickets across virtual, in-office, and in-room appointments, and set up wired/wireless connectivity for campus residents.

Technology Center Consultant
Sep 2023 – Nov 2023

- Troubleshot software and printer issues for walk-in clients and kept lab equipment stocked and organized.
- Logged and tracked issues in ticketing systems, producing customer and lab reports.

SKILLS

Languages
JavaScript, TypeScript, Python, PHP, MySQL

Web & Frameworks
React / Next.js, HTML, CSS, FastAPI, Firebase, Git

Design
Figma, UX & HCI Design, Accessibility, Web Design, Tableau

AI & Cloud
Claude Code (AI-assisted dev), Google Cloud Run, Twilio, Redis

Tools
VS Code, WSL, Linux, macOS, Windows

CERTIFICATIONS

- Certiport ITS — Computational Thinking, Cybersecurity, Networking, Device Config
- Cisco Certified Support Technician — Cybersecurity
- Cisco IT Essentials
- TestOut PC Pro

PROJECTS

- **TRACTION Rep Console** — AI-scored retention queue for Tire Rack reps (UX · Prototype · CRM)
- **TRACI SMS Gateway** — text Tire Rack's AI agent (Twilio · Cloud Run)
- **Karst** — privacy-first caving field guide, live on web + Android (Next.js + Firebase)
- **ITIT** — IoT inventory tracker (capstone)
- **Corne 42** — hand-built split wireless keyboard with rotary encoders (ZMK)

OFF THE CLOCK

Caving · Coffee · Gym · Hiking · PC building · Custom keyboards · Plants · Reading · Swimming
